📌

Group Project (07-07-2022 to 31-07-2022)

What you will get from this project

- teamwork experience
- git, GitHub code collaboration experience
- Jira experience
- a project for your portfolio
- future help from others' experience that will assist us to get hired

To-Do List

- [ ] team first meet-up
- [ ] project plan
- [ ] coding
- [ ] testing
- [ ] deploying

First Meet-up topics

1. Any ideas are welcomed let us have a brainstorm :)
2. Project planning includes:

   - project name

- goals and objectives

- use cases

- technologies that will be used in this project

- tasks of each team member

3. wireframes

   hopefully, we can finish wireframes in our first meet-up, and then start coding

4. Github

   decide who holds the main folder of our project.

   How many branches, Main, Dev, Features?

   Rules we need to follow for commit and creating pull requests

Useful links

- from 7:00 is about Github, a very good tutorial

3 Skills That Will Help You Succeed as a Junior Developer (UK)

Three skills that will help you as a Junior developer. Either as a
software engineer or as a web developer. I'm drawing on my experience
as a React developer...
